

# I want our school to be an eco-school

Pupil: Peshkina Olga

Class: 7 «v»

Teacher: O. N. Ryabova

o I've chosen this project because I want to tell you how our school can be an eco-school.

o In our school we have some environmental activities. Honestly, I would like to have more.

- o First of all, administration can organise activity by asking pupils to pick up litter in some places of our town.

o More bins could be installed in the school.

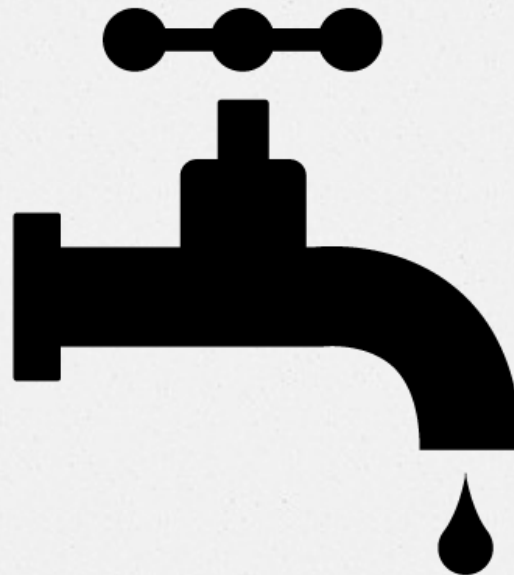

o In my school could be lessons about recycling and possible ways of reusing different things.

**REUSE**   
**REDUCE**  
**RECYCLE**

o In fine weather you can ride the bicycle or walk instead of going by car. Pollution from cars damages nature and people's health.

o And don't forget – You can help the Earth simply by closing the tap and save the water. It's easy.

o In conclusion I want to say that the Earth is our home and we should care of it.

# Fill in the gaps

- o Pollution from cars damages ... and people's ...
- o You can help the Earth by ... the tap
- o ... is our home

o Thank you for  
your attention
